

SCIENTIFIC PROGRAMME

Thursday, October 18, 2018

GPOH-PROGRAMME

- 10:00-10:15 Diffuse glioma WHO grade II of childhood and adolescents: Which treatment recommendations result from molecular histology?
A. Gnekow, Augsburg
- 10:15-10:35 Novel developments in pediatric brain tumor molecular diagnostics and therapy: the MNP2.0 study and LOGGIC Europe trial MNP2.0/LOGGIC
O. Witt, Heidelberg

10:35-11:00 Coffee break

- 11:00-11:20 Therapy optimization in early childhood medulloblastoma: Subgroup-specific survival and IQ-outcomes
S. Rutkowski, Hamburg
- 11:20-11:55 **PSAPOH**
30 years PSAPOH - State of the Art of Psychosocial Care in Pediatric Oncology and Hematology and Future Prospects (*H. Schröder, Lübeck*)
Psychosocial Research News
(*T. Pletschko, Wien*)
- Postersession - Research in psychosocial supply landscape
- 11:55-12:15 Risk adapted treatment of low-and intermediate risk neuroblastoma patients
T. Simon, Köln
- 12:15-12:30 Tumor predisposition in heritable retinoblastoma
P. Temming, Essen
- 12:30-12:45 Does it make a difference? Impact of the HLH registry on clinical patient management in a rare disease
S. Ehl, Freiburg /K. Lehmborg, Hamburg
- 12:45-13:00 The Increasing Role of Cancer Predisposition Syndromes in Pediatric Oncology
C. Kratz, Hannover

13:00-14:00 Lunch break

- 14:00-14:20 Moving from clinical phenotype to multiparameter pattern in risk assignment of modern childhood ALL therapy
M. Schrappe, Kiel
- 14:20-14:40 Prognosis Factors and Therapy in Pediatric AML
D. Reinhardt, Essen
- 14:40-15:00 Genomics of myelodysplastic syndromes in young individuals
M. Wlodarski, Freiburg

15:00-15:20 COSS & EURAMOS-1: Multicentric, international cooperation of a GPOH solid tumor group within a transatlantic consortium – challenges, results, conclusions
S. Bielack, Stuttgart

15:20-15:40 Ewing Sarcoma- an overview
U. Dirksen, Essen

15:40-16:00 Childhood Renal Tumours – The SIOP/GPOH approach
R. Furtwängler, Homburg

16:00-16:30 Coffee break

16:30-16:45 **Fritz-Lampert-Preis**

16:45-17:00 PHITT-study, CHIC-stratification, Molecular analyses, MiRNAs: what is new in the field of hepatoblastoma and hepatocellular carcinoma?
I. Schmid, München

17:00-17:15 The special role of Chronic Myeloid Leukemia in pediatrics: from a model disease in oncology to the identification of age-specific features
M. Metzler, Erlangen

17:15-17:30 Ovarian Sex Cord Stromal Tumors: How to Improve Treatment for Rare Tumors - A Report from the German MAKEI and STEP Working Groups
D. Schneider, Dortmund

17:30-17:45 The INFORM study: INdividualized therapy FORe Relapsed Malignancies in children
B. Worst, Heidelberg

17:45-19:30 GPOH General Assembly of Members (Only for GPOH-Members)
